MESensors
GmbH
Smart Sensorsolutions - On Demand

Name	**MESensors GmbH**
Address	Rolandstraße 40
Postal Code / City	52134 Herzogenrath · Germany
Contact Person	Bouchra Feiß
Phone	+49 152 3436 7720
E-Mail	bouchrafeiss@mesensors.com
Website	www.mesensors.com
Employees	3 Founders
Founded (year)	2022

MESensors GmbH, founded in April 2022 by three founders, offers two key services. Firstly, we provide sustainable and customized intelligent sensor solutions with integrated software for the medical technology and automotive sectors. Our expertise lies in complementing innovative designs, modernizing products, and automating production lines.

Secondly, we introduce our own product – an integration of our sensor solutions into cranial drills. This innovation offers precise control, minimizing risks by preventing the penetration or burning of brain tissue and surrounding soft matter. This advancement allows the procedure to be executed by robots or non-neurosurgical personnel.

We provide end-to-end services from consultation to production, support, returns, and repairs.

Our mission is to enhance safety and efficiency across industries using advanced sensor technologies.
