STIPP KICK-OFF

The border triangle of the Netherlands, Germany and Belgium is an innovative high-tech region with strengths in both research and industry – from SMEs to global companies. The high-tech impulses of this region provide answers to global challenges. The regional science enjoys the highest reputation on international level. The potential of this region can be further strengthened by intensifying the exchange of relevant stakeholders across borders.

The new STIPP project sets a focus on stimulating cross-border SME collaborations within the Meuse-Rhine region to develop new innovations that contribute to one or more of the strategic topics Industrial Transition, Green Transformation and Healthier Citizens.

We aim to strengthen innovation and cooperation in the border triangle with your help: At the **kick-off on November 21, 2024**, the project and your possibility of participation will be presented – And you can participate in an exchange of the community, which may serve as the fruitful basis for successful future cooperation.

In addition to inspiring insights into the sustainable effects that innovative cross-border cooperation projects have, the first call for proposals will also be published at the event.

So don't just get important first-hand information - be one of the first to launch a successful project in STIPP! Sign up [here!](#)
