Website	www.neurotime.com
Employees	5
Founded	2024

At neuroTime we developed the “Clock with **no numbers.**”

nonu – our app for iOS and Android – helps individuals struggling with time, temporal contexts, and daily structure, offering two key benefits:

On the one hand, it promotes inclusion and reduces reliance on caregivers.

On the other hand, it eases the growing workload of caregivers and therapists.

Our mission is to empower individuals to manage their daily activities more independently, facilitating greater autonomy and ultimately enhancing the quality of life for everyone.
