---

Health Care IT-Solutions GmbH (HITS) is a wholly-owned subsidiary of 'Universitätsklinikum Aachen' with the aim of offering doctors and clinics IT-based solutions for cross-sectorial treatment processes.

The focus is on telematics applications and value-added services in the healthcare system, especially the 'elektronische FallAkte' (eFA).

The application 'FallAkte Plus' offered by HITS is certified by 'Kassenärztliche Bundesvereinigung' as an external application for the secure network of 'Kassenärztliche Vereinigungen', so that every resident doctor is able to work with 'FallAkte Plus' without any intervention by their infrastructure. Furthermore the 'Gematik' pursues a migration project aiming to migrate the 'FallAkte' accompanied by 'FallAkte Plus' to the telematics infrastructure.

'FallAkte Plus' also provides an efficient communication platform for innovative healthcare projects.
