---

Heinen Automation plans, conceives and realises solutions in automation. The focus is on handling systems which are predominantly equipped with robots and picture data processing systems.

In addition, Heinen Automation is your professional partner when planning and realising aims of Industry 4.0 is on your agenda.

The development of individual software solutions and the realisation of combined hard- and software systems ranks among our core competencies.

This includes database application, data logging and production data acquisition as well as complex control engineering solutions.
