<i>Website</i>	www.medicor.de
<i>Employees</i>	86
<i>Founded (year)</i>	1993

---

For more than 25 years, **Hologic Medicor** has been supplying the European market with high-quality medical technology products.

As a global leader in women's health, our **Breast & Skeletal Health** division strives to advance early detection, more certain diagnoses and accurate treatment.

Our Genius **3D™ Mammography™** exam, offered through our Selenia® Dimensions® system, finds 20-65% more invasive breast cancers and reduces callbacks by up to 40% compared to 2D alone. Along with our other products, it reflects our ongoing drive to introduce innovations that bring greater certainty and peace of mind to both patients and the healthcare professionals.

The gold standard for bone densitometry was set in 1987 with the first dual-energy X-ray absorptiometry (DXA) system. Today, we continue to take bone health to new heights, with the **Horizon® DXA** platform, which assesses osteoporosis, cardiovascular disease and obesity.
