Employees 25

Founded (year) 1999

The Impetus Group is a highly specialized engineering service supplier for product development with its core know how in plastics. Impetus is working in accordance to a development process which is adapted to the particular challenges (risk management, documentation, etc.) of the medical engineering sector. Besides this systematic approach, experiences gained in other industries are implemented to the advantage of the process. Being capable of either executing singular tasks of product development such as conceptual designs, FEA etc. or conducting the complete development process of a product shows the ability of Impetus to flexibly adjust to its customers' requirements. The Impetus service portfolio is completed by project management and coordination tasks of development partners.
