Employees NL 25-30 / PL 130-150

Founded (year) 2002

Valuepack is a medical product development, packing and assembly specialist for sterilized or non-sterilized products. This can be the technology and the implementation of either primary or secondary packed medical products, which we carry out in cleanrooms in our plant in Holland or Poland. With 2 locations in Europe, technical know-how and a high quality assurance we can be the right partner for your product development and/or production of medical devices or medical products. Both companies are certified according to the ISO13485 standard and work is done according to the GMP standards.

We are looking for companies to start up a R&D project, a technical co-operation, a manufacturing agreement or a direct client relationship. We can offer services from packaging design and process validation until assembling, production, packing, testing, sterilization and distribution of medical devices or medical products. We can offer big variety of possibilities for production series for example from 100 pieces - 1.000.000 pieces.

We look for companies that are involved with medical device, medical related products, for example plasters, syringes, powders, flacons, ampoules, catheters, kits etc..
